

Junior Engineer

Wasim Hamid

Personal Statement

I am a junior developer, and I am hoping to seek my first role within the software engineering field. My favourite subject in school was Information technology, which is why I chose to pursue it in college. Whilst studying my course, I found a passion for website creation and writing code. After finishing college, I came to the realization, that University was not for me.

However, I wanted to continue learning and utilizing new coding languages for my projects. I am now sufficient in the use of many coding languages like HTML, CSS and JavaScript. Also, using ReactJS for my portfolio website (You can view it in the website section below). I would like a career in the programming sector, and to continue using and learning more about ReactJS.

EXPERIENCE

Freelance Developer (*August 2019 – July 2020*)

Building Custom Designed Website

- Supported **Playermade.club** with the redesign and rebuilding of their website.
- Used Figma (prototype building website) to create designs and ideas for the client.
- Edited HTML/CSS/JavaScript and created responsive mobile designs.
- Communicated with the client via WhatsApp and Calls weekly.
- Taking designs or website examples and translating it into the website.
- Used Git and Netlify. Git was used to upload code to GitHub and Netlify to host website and show client updates.
- Transferred client's domain to Netlify via DNS – to use custom domain.
- Used Vimeo to host high-definition videos

KEY SKILLS

Hobbies & Interests

My favourite sport is football which I like playing and watching. I hope that I can watch different teams around the world and visit many football stadiums. Additionally, I also like staying fit by visiting the gym and playing basketball and table tennis. I also like visiting snooker clubs with friends to play pool or snooker and socialize.
